## **Announcement to NZX**

### **Refining NZ Throughput and Margin Report for November/December 2015**

Refining NZ finished the year with an all-time record Processing Fee for the year of NZD 378.7 million. This was earned on a throughput of 42.6 million barrels, another all-time record and 4.5% ahead of our original guidance of 40.8 million barrels.

The Gross Refinery Margin<sup>1)</sup> (GRM) for the November/December period – prior to Cap adjustments – was USD 10.82 per barrel, resulting in a Processing Fee income of NZD 72.6 million. The Cap adjustment for the period was NZD 7.2 million and for the full year ended at NZD 14.4 million.

The Singapore complex margin for the period strengthened to an average of USD 6.37 per barrel. Refining NZ's margin uplift over the Singapore complex margin was USD 4.45 per barrel. A throughput of 7.0 million barrels was achieved for the period.

The Te Mahi Hou project was started up during the last week in November and is operating in line with expectations.

The average exchange rate for the period was USD/NZD 0.67.

Appendix I shows further information on throughput, margin and refining income.

#### **Historical Analysis**

A five year history of Throughput, Margins and Processing Fees is attached as Appendix II and can also be found on the company's website: [www.refiningnz.com](http://www.refiningnz.com)

- 1) The Margin Cap limits the Processing Fee to a maximum Gross Refining Margin of 9 USD per barrel for over a calendar year. The Margin Cap applies to each Customer severally (see Explanatory Notes for more detail).
- 2) Refining NZ's Gross Refining Margin is defined as the typical market value of the products produced minus the typical market value of the feedstock used, expressed per barrel of feedstock used. The margin incorporates the cost of the hydrocarbon used for fuel and incurred as process losses.

<b>May/June</b>	Throughput	Barrels (million)	6.42
	Gross Refining Margin	USD (million)	50.2
	Gross Refining Margin (excluding Floor/Cap)	USD (million)	54.8
	Interim Cap adjustment	NZD (million)	4.5
	Processing Fee (after Floor/Cap)	USD (million)	35.2
	Processing Fee (excluding Floor)	USD (million)	38.4
	Processing Fee (excluding Floor/Cap)	NZD (million)	53.4
	Processing Fee (after Floor/Cap)	NZD (million)	48.9
YTD Cap adjustment	NZD (million)	7.8	
<b>Jul/Aug</b>	Throughput	Barrels (million)	7.52
	Gross Refining Margin	USD (million)	59.8
	Gross Refining Margin (excluding Floor/Cap)	USD (million)	57.6
	Interim Cap adjustment	NZD (million)	-2.3
	Processing Fee (after Floor/Cap)	USD (million)	40.3
	Processing Fee (excluding Floor)	USD (million)	40.3
	Processing Fee (excluding Floor/Cap)	NZD (million)	61.2
	Processing Fee (after Floor/Cap)	NZD (million)	63.5
YTD Cap adjustment	NZD (million)	5.5	
<b>Sep/Oct</b>	Throughput	Barrels (million)	7.22
	Gross Refining Margin	USD (million)	66.8
	Gross Refining Margin (excluding Floor/Cap)	USD (million)	68.4
	Interim Cap adjustment	NZD (million)	1.7
	Processing Fee (after Floor/Cap)	USD (million)	46.7
	Processing Fee (excluding Floor)	USD (million)	47.9
	Processing Fee (excluding Floor/Cap)	NZD (million)	73.5
	Processing Fee (after Floor/Cap)	NZD (million)	71.8
YTD Cap adjustment	NZD (million)	7.2	
<b>Nov/Dec</b>	Throughput	Barrels (million)	7.02
	Gross Refining Margin	USD (million)	69.1
	Gross Refining Margin (excluding Floor/Cap)	USD (million)	75.9
	Interim Cap adjustment	NZD (million)	7.2
	Processing Fee (after Floor/Cap)	USD (million)	48.3
	Processing Fee (excluding Floor)	USD (million)	53.2
	Processing Fee (excluding Floor/Cap)	NZD (million)	79.8
	Processing Fee (after Floor/Cap)	NZD (million)	72.6
YTD Cap adjustment	NZD (million)	14.4	

Note: The GRM for a period may be above or below the Cap of USD 9.00 per barrel due to previous year price updates, which are not subject to the Floor/Cap in the current year

## Explanatory Note

### Throughput

Throughput is the volume of feedstock intake, comprising crude oil, residues, natural gas and blendstock, measured in barrels. One barrel equates to approximately 159 litres.

### Gross Refining Margin

The Gross Refining Margin is calculated in USD as the difference between the value of products and the cost of feedstock for each refining customer. The value of products use Singapore quoted prices adjusted for New Zealand quality and the cost of importing those products to New Zealand. Feedstocks are valued using the notional market values adjusted for the cost of getting the feedstock to the refinery. The Gross Refining Margin incorporates the cost of hydrocarbon used as fuel and incurred as process losses.

Typically, Refining NZ has an uplift over the Singapore complex margins of around USD 3.00 to 4.00 per barrel. The value of the uplift varies due to fluctuations in freight rates, product quality premia, crude market premia and operational performance. Product quality premia are the cost differentials between products made to New Zealand quality and products made to the quality that applies to quoted prices in Singapore. Crude market premia are the cost differences between the crude types actually processed at Refining NZ and Dubai (used as basis for the Singapore complex margins).

### Margin Cap/Fee Floor Adjustment

The processing agreements with our customers contain both Floor and Margin Cap clauses, both effective over a full calendar year.

The Fee Floor is the minimum Processing Fee due, for a calendar year, up to a current maximum of NZD 126 million. If the year-to-date Processing Fee is below the pro-rata Fee Floor, then an interim pro-rata Fee Floor payment is made by the Customers. Should the Processing Fee exceed the Fee Floor in future months any pro-rata Fee Floor payments that have been made are repaid to the Customers.

The Margin Cap limits the Gross Refining Margin for each customer to a maximum of USD 9.00 per barrel over the calendar year. Should the Gross Refining Margin fall below the Cap in future months any pro-rata Cap reductions that have been made are repaid by the Customers.

The Cap and the Floor are subject to year-to-date adjustments.

Any balance remaining at the end of the year cannot be carried over to the next year.

### Gross Refining Margin after Cap/Floor

The Gross Refining Margin adjusted for any impacts of the Cap or Floor.

### Processing Fee

The Processing Fee is 70% of the Gross Refining Margin after any adjustment for the Cap or Floor. The Processing Fee is paid by our customers in NZD.

### Notes:

1. The information provided in this announcement relates to refining operations only. Revenue from pipeline or other activities is not included.
2. The Processing Fee results reported in this announcement are subject to change due to post announcement price updates and independent audit.
